1. Introduction

The Novo Nordisk Learning Hub is the company's employee training portal. Trainers publish training sessions, employees register with one click, and every registration automatically produces an Outlook calendar invitation containing the meeting link, agenda and a reminder. Administrators manage people, send announcements and follow everything through dashboards and exportable reports.

There are three roles, and what you see after signing in depends on yours:

Role	Who it is for	What they can do
Trainee	New hires and employees taking training	Browse the catalogue, register ("Notify Me"), join meetings, download materials, rate sessions
Trainer	Employees who deliver training	Create and publish events, manage registrations, mark attendance, view reports
Administrator	The L&D team	Everything above, plus managing trainers and trainees, announcements, settings and data

2. Getting started

2.1 Signing in

1. Open the Learning Hub web address in your browser (for example **novo-learning-hub.vercel.app**).
2. Enter your work email and password.
3. Click **Sign in**. You land on your personal dashboard.

Standard accounts:

Role	Email	Password
Administrator	admin@novonordisk.com	Admin@123
Trainer	trainer@novonordisk.com	Trainer@123
Trainee	trainee@novonordisk.com	Trainee@123

Forgot password? Click the link on the sign-in screen. (In this environment, ask the administrator to reset your password instead.)

2.2 Finding your way around

- **Sidebar (left):** your pages — Dashboard, Events, Calendar, Notifications, and role-specific pages such as Trainers, Trainees, Reports and Settings.
- **Bell icon (top right):** your notification centre; a red badge shows unread items.
- **Moon/sun icon (top right):** switches between light and dark mode.

- **Sign out:** the exit icon next to your name at the bottom of the sidebar.

3. Guide for Trainees

3.1 Finding a training

- **Trainings page:** shows every published session as a card with date, time, platform, trainer and remaining seats.
- **Filters:** search by keyword, or narrow by category and platform, then click Apply.
- **Calendar page:** the same sessions on a monthly calendar. Click any entry for a quick summary, then “Full details”.

3.2 Registering — the Notify Me button

1. Open a training and read the details: agenda, prerequisites, materials and trainer.
2. Click the large **Notify Me** button.

One click does all of this automatically:

- Reserves your seat (capacity is enforced — full sessions show “fully booked”).
- Creates the online meeting on the selected platform (Microsoft Teams, Zoom, Google Meet or Webex).
- Downloads an Outlook calendar invitation (.ics) containing the meeting link, agenda, trainer, location and a reminder.
- Sends a confirmation to your notifications.

3.3 Adding the invitation to Outlook

- **Outlook desktop app:** double-click the downloaded .ics file, then click Save & Close in the window that opens.
- **Outlook on the web:** Calendar → Add calendar → Upload from file → choose the .ics file → Import.

You can re-download the invitation any time from the event page (“Add to Outlook Calendar”).

3.4 On the day

- **Join:** open the event page and click Join meeting, or use the link in your Outlook invitation — they are the same link.
- **Materials:** download attached files from the Training materials section of the event page.

3.5 After the session

- **Feedback:** when the trainer marks the session completed, the event page shows a star rating and comment box — your rating feeds the trainer's average.
- **History:** your dashboard lists past sessions with your attendance status and overall completion rate.

3.6 Cancelling a registration

Open the event and click Cancel registration. Your seat is released for a colleague.

4. Guide for Trainers

4.1 Your dashboard

Shows today's sessions, upcoming sessions, your unique trainees, completed and pending sessions, and your attendance rate with average rating. Every tile is clickable and opens the matching list.

4.2 Creating a training event

1. Click **Create event** (dashboard or My Events page).
2. Fill in the form — the key fields are below.
3. Click **Publish event** to make it instantly visible to all trainees, or **Save as draft** to finish later.

Field	Notes
Title & description	What trainees see in the catalogue
Category	One of the admin-configured categories
Date, start/end time, time zone	When the session runs
Meeting platform	Teams, Zoom, Google Meet, Webex — the meeting link is generated automatically at publish — or Physical Meeting (enter a venue)
Maximum participants	Registration closes automatically when full
Materials & attachments	Upload files trainees can download
Agenda	One item per line; appears on the event page and in calendar invitations
Reminder	How long before the session Outlook reminds participants
Repeat / visibility	Recurrence and audience (everyone, batch or department)

4.3 Managing an event

- **Edit:** change any field; the event page updates immediately.
- **Duplicate:** copies the event as a new draft — handy for recurring sessions.
- **Cancel event:** marks it cancelled and notifies registered trainees.
- **Mark completed:** closes the session after it has run; this unlocks trainee feedback.
- **Add to Outlook Calendar:** downloads the .ics invitation for your own calendar.

4.4 Attendance

On your event page, the Participants panel lists every registrant with ✓ / X buttons. Mark attendance during or after the session — it drives the attendance statistics in dashboards and reports.

4.5 Your trainees and reports

- **Trainees page:** everyone who registered for your sessions; click a person for their full training history.
- **Reports page:** training, attendance, participation and feedback reports — filter by trainer, category, department or date range, and export to Excel/CSV or PDF.

5. Guide for Administrators

5.1 Dashboard

A live overview of the whole platform: upcoming events, today's sessions, active trainers and trainees, completed and pending trainings, registrations, average rating and attendance — plus charts for trainings per month, attendance trend, categories and most active trainers. Every tile is clickable.

5.2 Managing trainers

1. Open **Trainers** in the sidebar.
2. Click **Create trainer** and enter name, work email, department and job title. The account is created with the temporary password `Trainer@123`.

Per-trainer actions (icons on each row):

- **Edit** (pencil): update name, email, department or title.
- **Reset password** (key): resets to `Trainer@123`.
- **Disable/enable** (power): blocks or restores sign-in without deleting history.
- **Delete** (bin): removes the account; drafts are deleted, future sessions are cancelled with a notice, completed history is kept.

The number of trainer seats is limited by the “Number of trainer seats” setting.

5.3 Managing trainees

- **Trainees page**: all onboarding employees with registrations, attendance and status. Filter by name, department or joining date.
- **Detail view**: click a person for their profile and complete training history, including ratings they gave.
- **Delete** (bin): permanently removes the person with their registrations and feedback.

5.4 Announcements

Notifications page → Send announcement: title, message, and audience (everyone, trainers only, or trainees only). It appears in recipients' notification centres immediately.

5.5 Reports

Seven reports — training, attendance, trainer performance, employee participation, feedback & ratings, upcoming and missed trainings. All respect the filter bar (trainer, category, department, date range) and can be exported to Excel/CSV or printed to PDF.

5.6 Settings

- **General**: trainer seats, working hours, brand colour.

- **Departments & categories:** add or remove the lists used across the portal.
- **Integrations:** toggles for Outlook, Teams, Zoom, Google Meet, Webex, Azure AD SSO and SMTP email.
- **Reset platform data** (red section): erases all events, registrations, notifications and users except the three standard accounts. Cannot be undone — it asks for confirmation.

6. The calendar at a glance

Every role has a monthly calendar. Events are colour-coded:

Colour	Meaning
Blue	Scheduled today
Orange	Upcoming
Green	Completed
Red	Cancelled
Grey	Draft (visible to its trainer and admins only)

Click any event for a summary popup with a link to the full page, where trainees can register directly.

7. Frequently asked questions

Question	Answer
I registered — where is my meeting link?	On the event page (Join meeting button) and inside the Outlook calendar invitation that downloaded when you registered.
The session is full. Can I still join?	No — capacity is enforced. Check back in case someone cancels, or ask the trainer to raise the maximum.
I can't sign in.	Check the email and password carefully. If it still fails, your account may be disabled — contact the administrator.
Can I change my rating?	Yes — submit the stars again on the event page; your previous rating is replaced.
Who can see draft events?	Only the trainer who created them and administrators. Trainees see published events only.
How do I put a session in my Outlook?	Trainees: automatic when you click Notify Me. Trainers: use Add to Outlook Calendar on your event page. Then open the downloaded file and save.

8. Good to know (demo environment)

- Meeting links for Teams, Zoom, Google Meet and Webex are generated by the portal in a realistic format. In a production rollout these are provisioned through each vendor's official API using company credentials.
- Calendar invitations (.ics files) are fully real and import into Outlook. In production they would additionally be emailed to participants automatically.
- Azure AD single sign-on and SMTP email appear in Settings as integration points; they activate when IT connects company credentials.
