1. Introduction

The Novo Nordisk Learning Hub is the company's employee training portal. Training is organised as events (programmes): each event contains one or more sessions, and every session is its own meeting with its own date, time, platform, meeting link, trainer and category. Trainees are organised in batches, each batch is led by a team leader, and events can be targeted at specific batches.

There are four roles. What you see after signing in depends on yours:

Role	Who it is for	What they can do
Trainee	New hires and employees taking training	See the events for their batch, register with Notify Me, join sessions, download per-session Outlook invitations, rate trainings
Trainer	Employees who deliver training	Create events and sessions (when enabled), add sessions to events they are assigned to, mark attendance, view reports
Team Leader	Leads one or more trainee batches	Dashboard with their trainees' progress — registrations, attendance, upcoming sessions
Administrator	The L&D team	Everything: events, sessions, trainers, team leaders, batches, trainees, announcements, reports, settings

2. Getting started

2.1 Signing in

1. Open the Learning Hub web address in your browser.
2. Enter your work email and password, and click **Sign in**.

Standard accounts:

Role	Email	Password
Administrator	admin@novonordisk.com	Admin@123
Trainer	trainer@novonordisk.com	Trainer@123
Trainee	trainee@novonordisk.com	Trainee@123
Team Leader	teamleader@novonordisk.com	Leader@123

2.2 Finding your way around

- **Sidebar (left):** your pages — Dashboard, Events, Calendar, Notifications, plus role-specific pages (Trainers, Team Leaders, Batches, Trainees, Reports, Settings for admins).
- **Bell icon:** notification centre; a red badge shows unread items.
- **Moon/sun icon:** light / dark mode.
- **Sign out:** the exit icon next to your name at the bottom of the sidebar.

3. How events and sessions work

An event is a training programme. Inside it are sessions — for example, “Training Programme June” with sessions on the 10th, 11th and 12th. Every session has its own:

- **Name** (e.g. “Kick-off”, “Deep dive”) — editable
- **Trainer** — each session can be delivered by a different trainer
- **Training category**
- **Date, start and end time**
- **Platform and meeting link** — Teams, Zoom, Google Meet, Webex (link generated automatically at publish) or a physical venue

One registration covers the whole programme: a trainee clicks Notify Me once and is registered for every session.

3.1 Outlook calendar — per session

Every session row on the event page has its own Outlook button (for registered trainees, the trainer and admins). Clicking it downloads a calendar invitation for that single session — with its meeting link, agenda, trainer and reminder — and the button turns into a green “Downloaded” tick that is remembered on your device.

- **Outlook desktop:** double-click the downloaded file, then Save & Close.
- **Outlook web:** Calendar → Add calendar → Upload from file → Import.

3.2 Event visibility — by batch

When creating an event you choose who can see it: Everyone, or one or more specific batches. Trainees outside the selected batches don't see the event anywhere and cannot register.

3.3 Registration window

Events can have a validity period (“registration valid from / until”). Outside the window the Notify Me button is replaced by a message and registration is refused.

4. Guide for Trainees

- **Find a training:** the Trainings page lists events visible to your batch (search + filters); the Calendar shows every session, e.g. “Programme (S2/3)”.
- **Register:** open an event and click the large Notify Me button — one click registers you for all sessions and creates the meetings.
- **Calendar invites:** use the Outlook button on each session; it turns into a green Downloaded tick.
- **On the day:** click Join on the session row, or use the link in your Outlook invitation.
- **Materials:** download attachments from the event page.
- **Feedback:** after the trainer marks the event completed, rate it with stars and a comment (your rating feeds the trainer's average).
- **Cancel:** open the event and click Cancel registration.

5. Guide for Trainers

- **Dashboard:** today's and upcoming sessions, your trainees, completed/pending counts, attendance rate and rating — every tile opens the matching list.
- **Create an event:** Create event → fill the details → add sessions with “Add session” (each with its own name, date, times, platform) → Publish (visible immediately) or Save as draft. Online sessions get meeting links automatically at publish.
- **Assigned events:** when an admin assigns you to a collaborative event, it appears in My Events with an “Add session” button — sessions you add are yours. You can see all sessions of events you're assigned to.
- **Manage:** Edit, Duplicate (a draft copy), Cancel (notifies registrants), Mark completed (unlocks feedback).
- **Attendance:** the Participants panel has ✓/X buttons per registrant; this drives the attendance statistics.
- **Reports:** training, attendance, participation and feedback reports with filters (trainer, category, department, dates) and Excel/CSV/PDF export.

Note: the administrator can switch off trainer event creation (Settings). In that case sessions are scheduled by L&D and simply appear on your dashboard and calendar.

6. Guide for Team Leaders

Each trainee batch is assigned to a team leader. Your dashboard shows your team's datapoints, scoped to the batches you lead:

- Stat cards: my trainees, batches led, total registrations, team attendance %, upcoming and completed sessions

- A per-trainee table (registered / attended / missed) linking to each profile
- An attendance-by-batch chart when you lead several batches
- **My Trainees:** the full list for your batches, with filters; click a person for their complete training history.
- **Calendar:** the sessions your trainees are registered for.

7. Guide for Administrators

7.1 Batches (master data)

1. Open **Batches** in the sidebar and click **Create batch** (e.g. “2026-Q4 New Hires”).
2. Pick the **team leader** for the batch from the dropdown.
3. Click **Add trainees** and tick as many trainees as needed (Select all supported) — adding moves them from any previous batch.

Deleting a batch clears its leader assignment and its members' batch.

7.2 People

- **Trainers:** create/edit/disable/delete, reset passwords (Trainer@123). Deleting cancels their future sessions with a notice and keeps completed history.
- **Team Leaders:** create/edit/disable/delete, reset passwords (Leader@123), and assign batches (one leader per batch — selecting a batch led by someone else reassigns it).
- **Trainees:** create/edit/delete with batch, department and title; temporary password Trainee@123.

7.3 Events

- **Create events** with any trainer per session; “Visible to” chips limit the event to selected batches (default Everyone); optional registration window.
- **Collaborative events:** tick “Allow trainers to add sessions” and assign multiple trainers — they get the event on their screen with an Add session button; you can create the event with no sessions and let them fill it in.

7.4 Announcements, reports & settings

- **Announcements:** Notifications page → Send announcement (everyone / trainers / trainees).
- **Reports:** seven filterable reports with Excel/CSV export and print-to-PDF.
- **Settings:** trainer seats, the “Trainers can create events & sessions” switch, working hours, brand colour, departments & categories, integration toggles, and the red Reset platform data control (erases everything except the standard accounts and settings).

8. Frequently asked questions

Question	Answer
Where are my meeting links?	On each session row (Join button) and inside that session's Outlook invitation.
Why can't I see an event a colleague sees?	It is probably limited to their batch. Events are shown only to the batches selected by the creator.
I clicked Notify Me — am I registered for all sessions?	Yes. One registration covers the whole programme; add each session to Outlook with its own button.
The session is full.	Capacity is enforced; check back for cancellations or ask the trainer to raise the maximum.
Registration is closed.	The event's registration window has passed. Contact L&D.
Who resets passwords?	The administrator — from the Trainers, Team Leaders or Trainees pages.

9. Good to know (demo environment)

- Meeting links are generated by the portal in a realistic format; in production they are provisioned through each vendor's official API.
- Outlook invitations (.ics) are fully real and import into Outlook; in production they would also be emailed automatically.
- Azure AD SSO and SMTP email activate when IT connects company credentials (Settings → Integrations).
